

Notice of Oral *Ex Parte* Presentation

September 26, 2007

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, DC 20554

Re: In the Matter of Service Rules for the 698-746, 747-762 and 777-792 MHz Bands (WT Docket No. 06-150), Former Nextel Communications, Inc. Upper 7000 MHz Guard Band Licenses and Revisions to Part 27 of the Commission's Rules (WT Docket No. 06-169), Implementing a Nationwide, Broadband, Interoperable Public Safety Network in the 700 MHz band (PS Docket No. 06-229)

Dear Ms. Dortch:

On September 25, 2007 Arvind Sodhani, President of Intel Capital, Sriram Viswanathan, Vice President and Head of Intel's WiMAX Program Office, and Peter Pitsch, Executive Director of Communication Policy, met with Commissioner McDowell and his wireless legal advisor, Angela Giancarlo.

In the course of a discussion primarily of WiMAX business development with Mssrs. Sodhani and Viswanathan, Mr. Pitsch asked a

question about the application of the so-called “no lock” requirement for the upper 700 MHz C block license created in the above referenced proceeding. He also expressed Intel’s preference that this requirement be limited to preventing C block licensees from “locking out” devices, but not prevent them from “locking in” devices. The latter arrangements might enhance consumer welfare by allowing carriers to subsidize devices and foster consumer acceptance of new services and technology.

Pursuant to Section 1.1206 of the Commission's Rules, 47 C.F.R. § 1.1206, a copy of this submission is being provided to each of the above parties. Please contact the undersigned with any questions in connection with this filing.

Respectfully submitted,

/s/ Peter K. Pitsch

Peter K. Pitsch
Intel Corporation
Director, Communications Policy
